OPTIMAX BLOWERS

Blow the Competition Away

PROFESSIONAL PRODUCTS FOR THE PAVING INDUSTRY

Professional pavers will say they're only as good as their equipment. The key to completing projects on time, efficiently, and profitably depends on precise planning and reliable equipment. Professionals in every industry have trusted Little Wonder equipment for over 90 years.

The Little Wonder line of asphalt and paving equipment greatly reduces prep time for the paving professional. Clearing debris, rocks and free-standing water has never been easier.

Our line of walk-behind blowers, also available in self-propelled models, are the most efficient in the industry, clearing debris further and faster than the competition.

Key Features

- » **Highest output levels** – Independent CFM tests prove that Little Wonder blowers move more air and push debris faster and farther than the competition, ultimately increasing your productivity.
- » **Welded, heavy gauge steel** – With the most durable blower housing on the market you can see why paving professionals with tough jobs choose Little Wonder.
- » **Large, long-lasting pneumatic tires** – Are featured on all blower models for easy maneuverability, even on rough, uneven ground or asphalt.
- » **Split-Stream Air Deflector** – Allows YOU to control the most powerful stream of air into those tight cracks that you would otherwise have to clean out with a brush.

ACCESSORY

Swivel Wheel Kit (P/N 9050-00-01) - designed to let the operator have 360° turning and control. You can easily lock the wheel in a straight direction when working across steep inclines. It also minimizes wear and tear on tires.

» **Revolutionary side to front discharge system** – Allows the operator to change air direction without tools and get as close to the curb as you want.

HIGH PERFORMANCE VAC

Superior Suction for a Flawless Finish

PROFESSIONAL PRODUCTS FOR THE PAVING INDUSTRY

The Little Wonder High Performance Vacuum (HPV) is an All-Terrain/All-Debris vacuum, clearing and collecting stones, bottles, cans, leaves, and other debris that would normally have to be swept up by hand.

The High Performance Vac features an advanced impeller and innovative housing design for superior suction and reduced noise levels. Through its advanced technology, the HPV offers the industry's best reduction ratio. The unique top-loading system fills debris bag completely without loss of suction. Nozzle height automatically adjusts to the terrain, so there's no need to stop the engine and change height settings. The powerful 205cc Briggs & Stratton® Vanguard™ engine offers ample power to easily pick up even wet debris quickly and completely.

Key Features

- » **Best reduction ratio** – At a 10:1 ratio, it reduces debris better than the competition translating into less time spent emptying the bag.
- » **Superior suction** – The result of our advanced impeller and housing design.
- » **Adjustable floating nozzle** – Nozzle height adjusts without having to stop the engine to change height settings. Height adjustments range from 3/4 to 3 inches.
- » **Quiet operation** – An advanced impeller and welded steel housing produce a “smoother air flow” decreasing the noise level for the operator.
- » **Rugged construction** – From our heavy-duty steel tubing and continuously welded housing to our 1/4” replaceable polyurethane housing liner, the HPV is built to last.
- » **Unique top-loading system** – Fills debris bag completely without loss of suction.

Superior suction, lets you get into those cracks that you would normally have to pick up by hand.

HPV – HIGH PERFORMANCE VACUUM SPECIFICATIONS

Model Number	5612
Horse Power	6.5*
Weight (pounds)	184
Engine Manufacturer	Briggs & Stratton® Vanguard™
Replacement housing Liner	Optional
Wheels	12” Pneumatic (rear), 10” Pneumatic (front)
Height Nozzle Adjustment	Automatic
Nozzle Width	29”
Fuel Capacity	3.4 quarts
Bag Capacity	8 Bushels (90 pounds)
Warranty	2-Year

* All power levels are stated horsepower per SAE J1940 as rated by Briggs & Stratton.

“ I’ve been developing previous pavement maintenance methods for the last 5 years and the Little Wonder is the best vac that I could find for the job. It even picks up material left after street vac trucks have passed over! ”

PRO CRACK CLEANER

Clearing The Way To A Quality Finish

PROFESSIONAL PRODUCTS FOR THE PAVING INDUSTRY

The Pro Crack Cleaner is a dedicated unit designed to clean cracks and crevices in asphalt and concrete surfaces. We understand that clearing away debris and undergrowth is extremely important before laying down crack filler and applying sealant. Using the Pro Crack Cleaner will save you time and allows for a more professional longer lasting crack fill and sealant application.

Key Features

- » **Adjustable front wheels** – Allow brush to stay down and keep clearing on uneven surfaces.
- » **Dual belt drive** – Provides added power and more grip to minimize slippage.
- » **Convenient belt release lever** – Enables unit to idle without added belt wear.
- » **Long-lasting wire wheel** – Heavy duty 9” wire wheel ensures professional, quality crack cleaning.
- » **Four-wheel design** – Provides extra stability and eliminates the need for a curb wheel. All wheels have steel hubs with ball bearings and full axles for smooth and easy maneuverability.

Our Pro Crack Cleaner powers through the toughest debris quickly preparing surface cracks for sealing and expansion joints for recaulking.

PRO CRACK CLEANER SPECIFICATIONS

Model Number	6236
Engine	Honda® GX120
Displacement	118cc
Handles	Anti-Vibration Grips; Extension Handle Optional
Cast Iron Cutter Head	Fixed
Drive Belt	Dual Belts
Wire Wheel	Heavy-Duty 9” Diameter Spring Steel Twisted Wire
Wheels	4 - 8” Steel Hubbed
Fuel Capacity	3 Quarts
Weight	77 lbs.
Warranty	1-Year Limited on Unit; 3-Year Manufacturer on Engine
